Generalização e sobre ajuste

Novos Dados

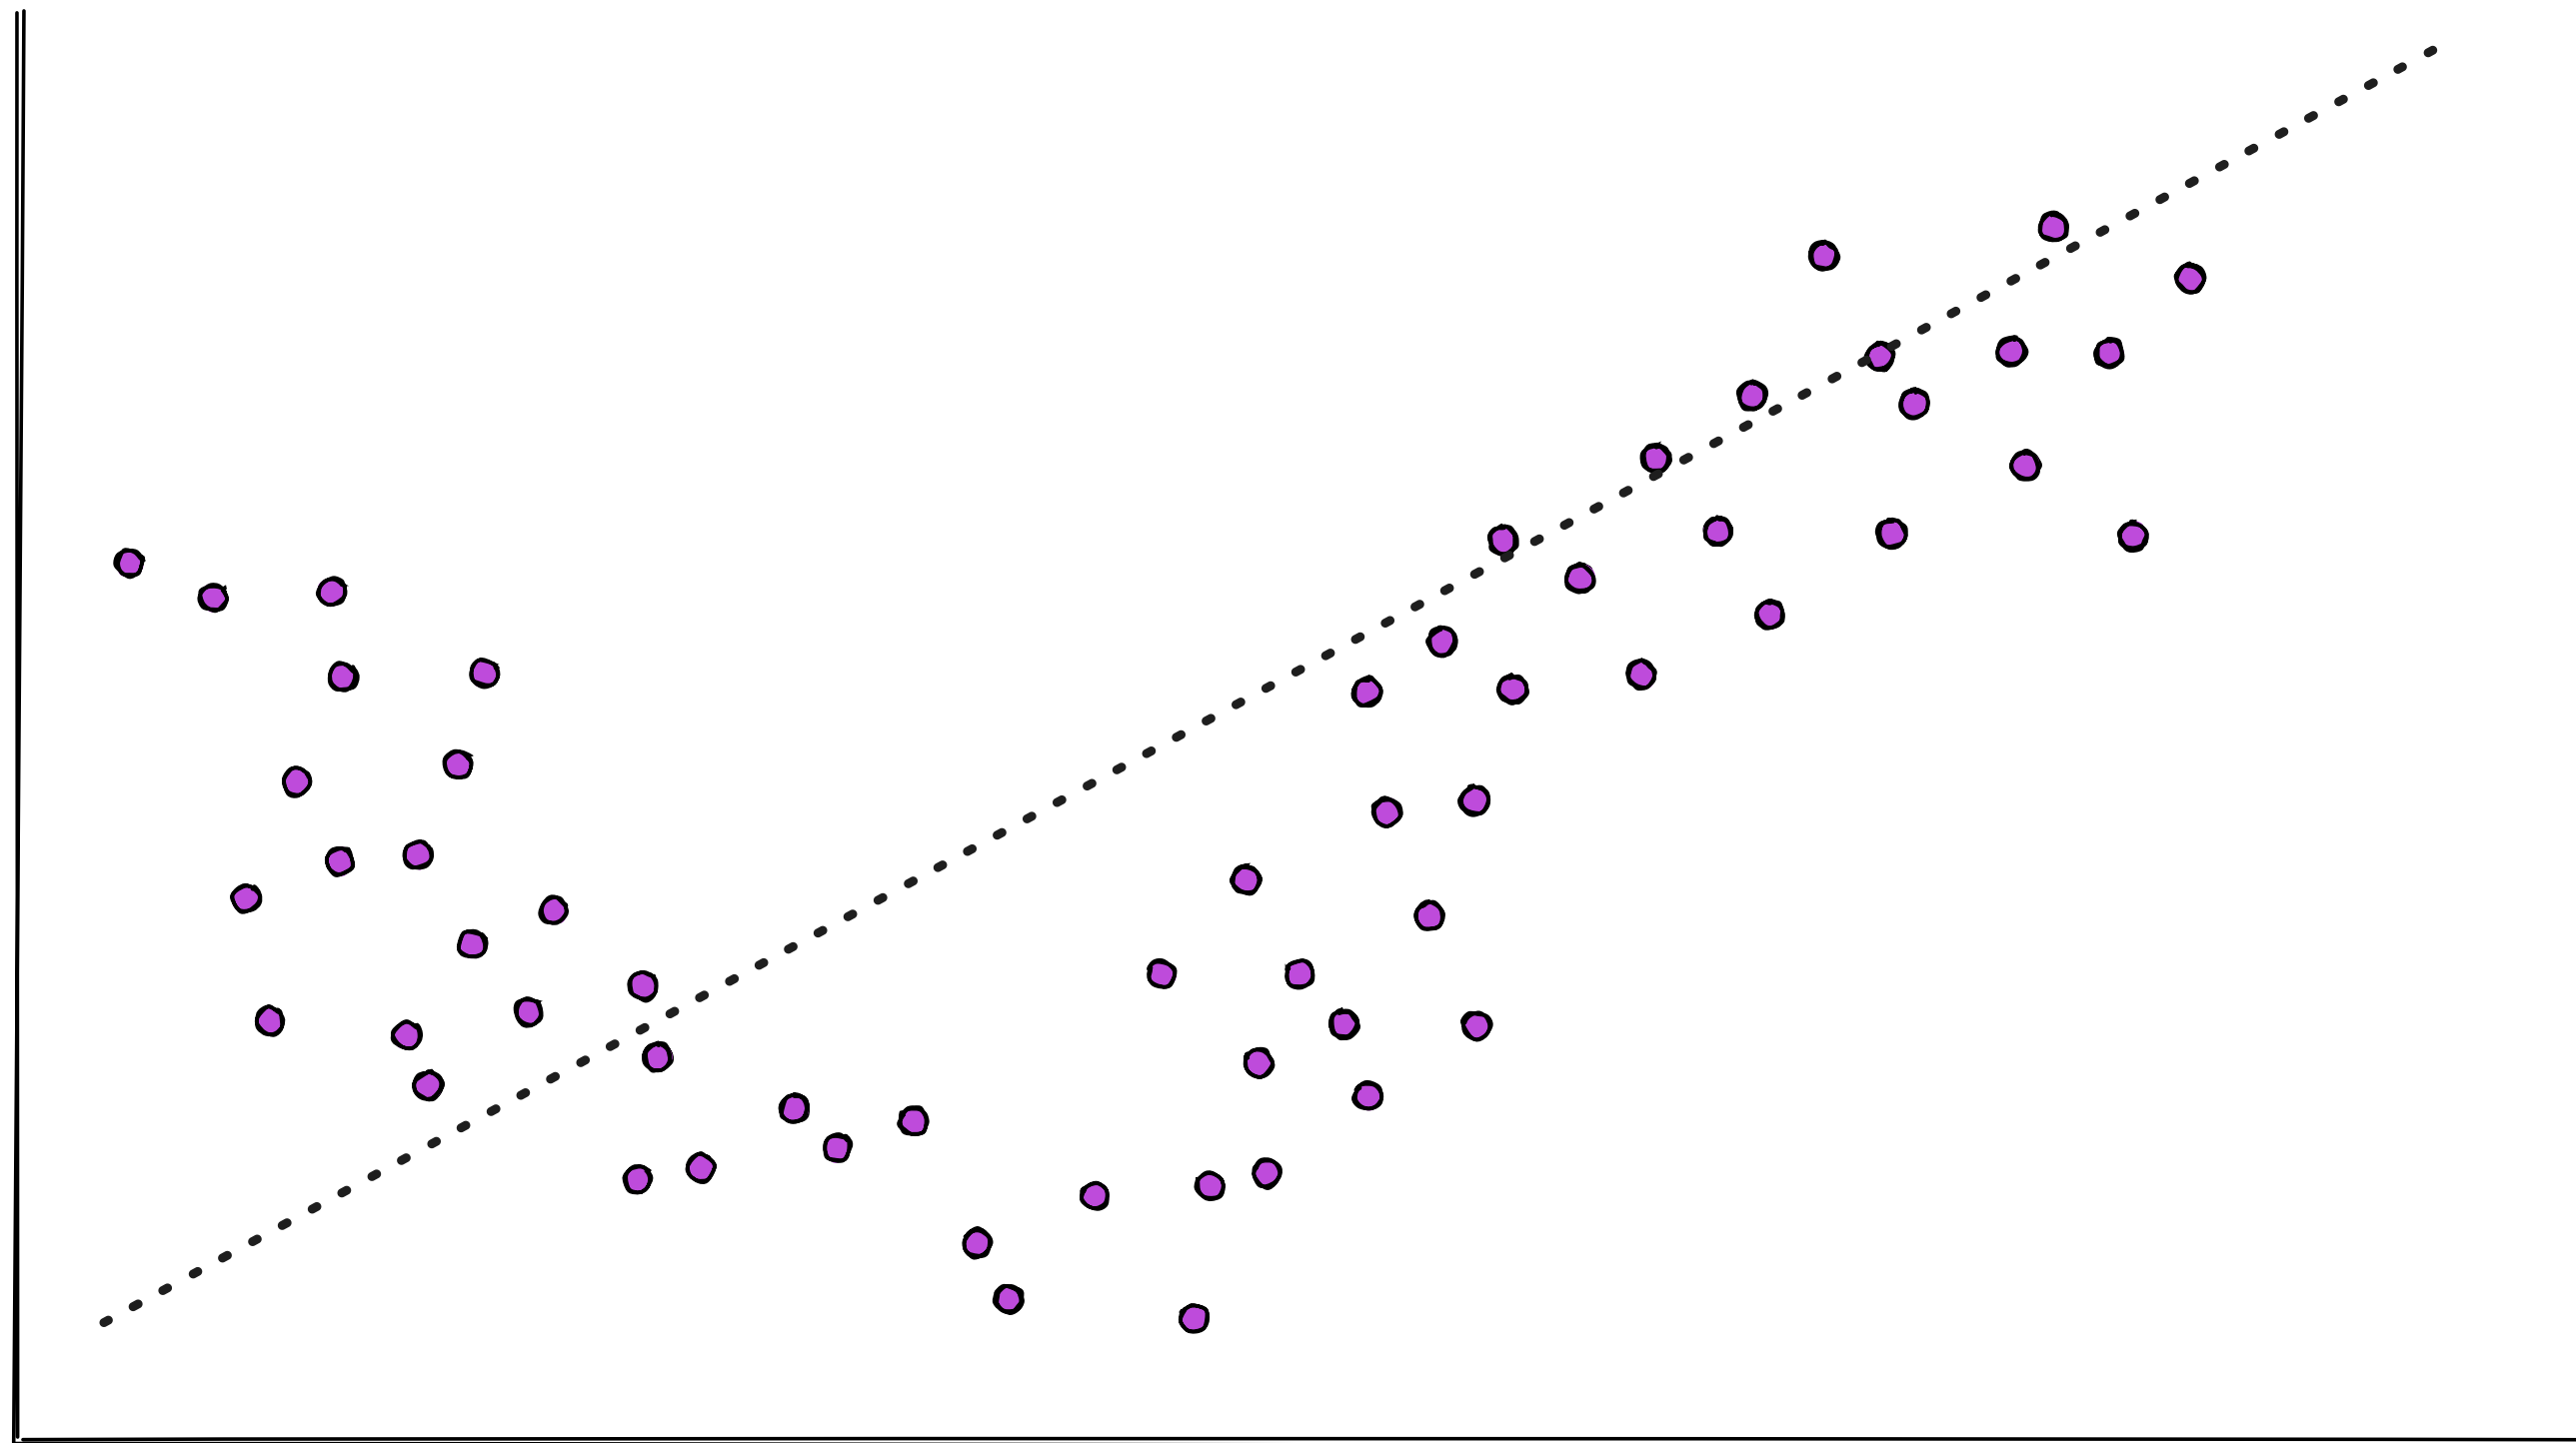

Overfitted

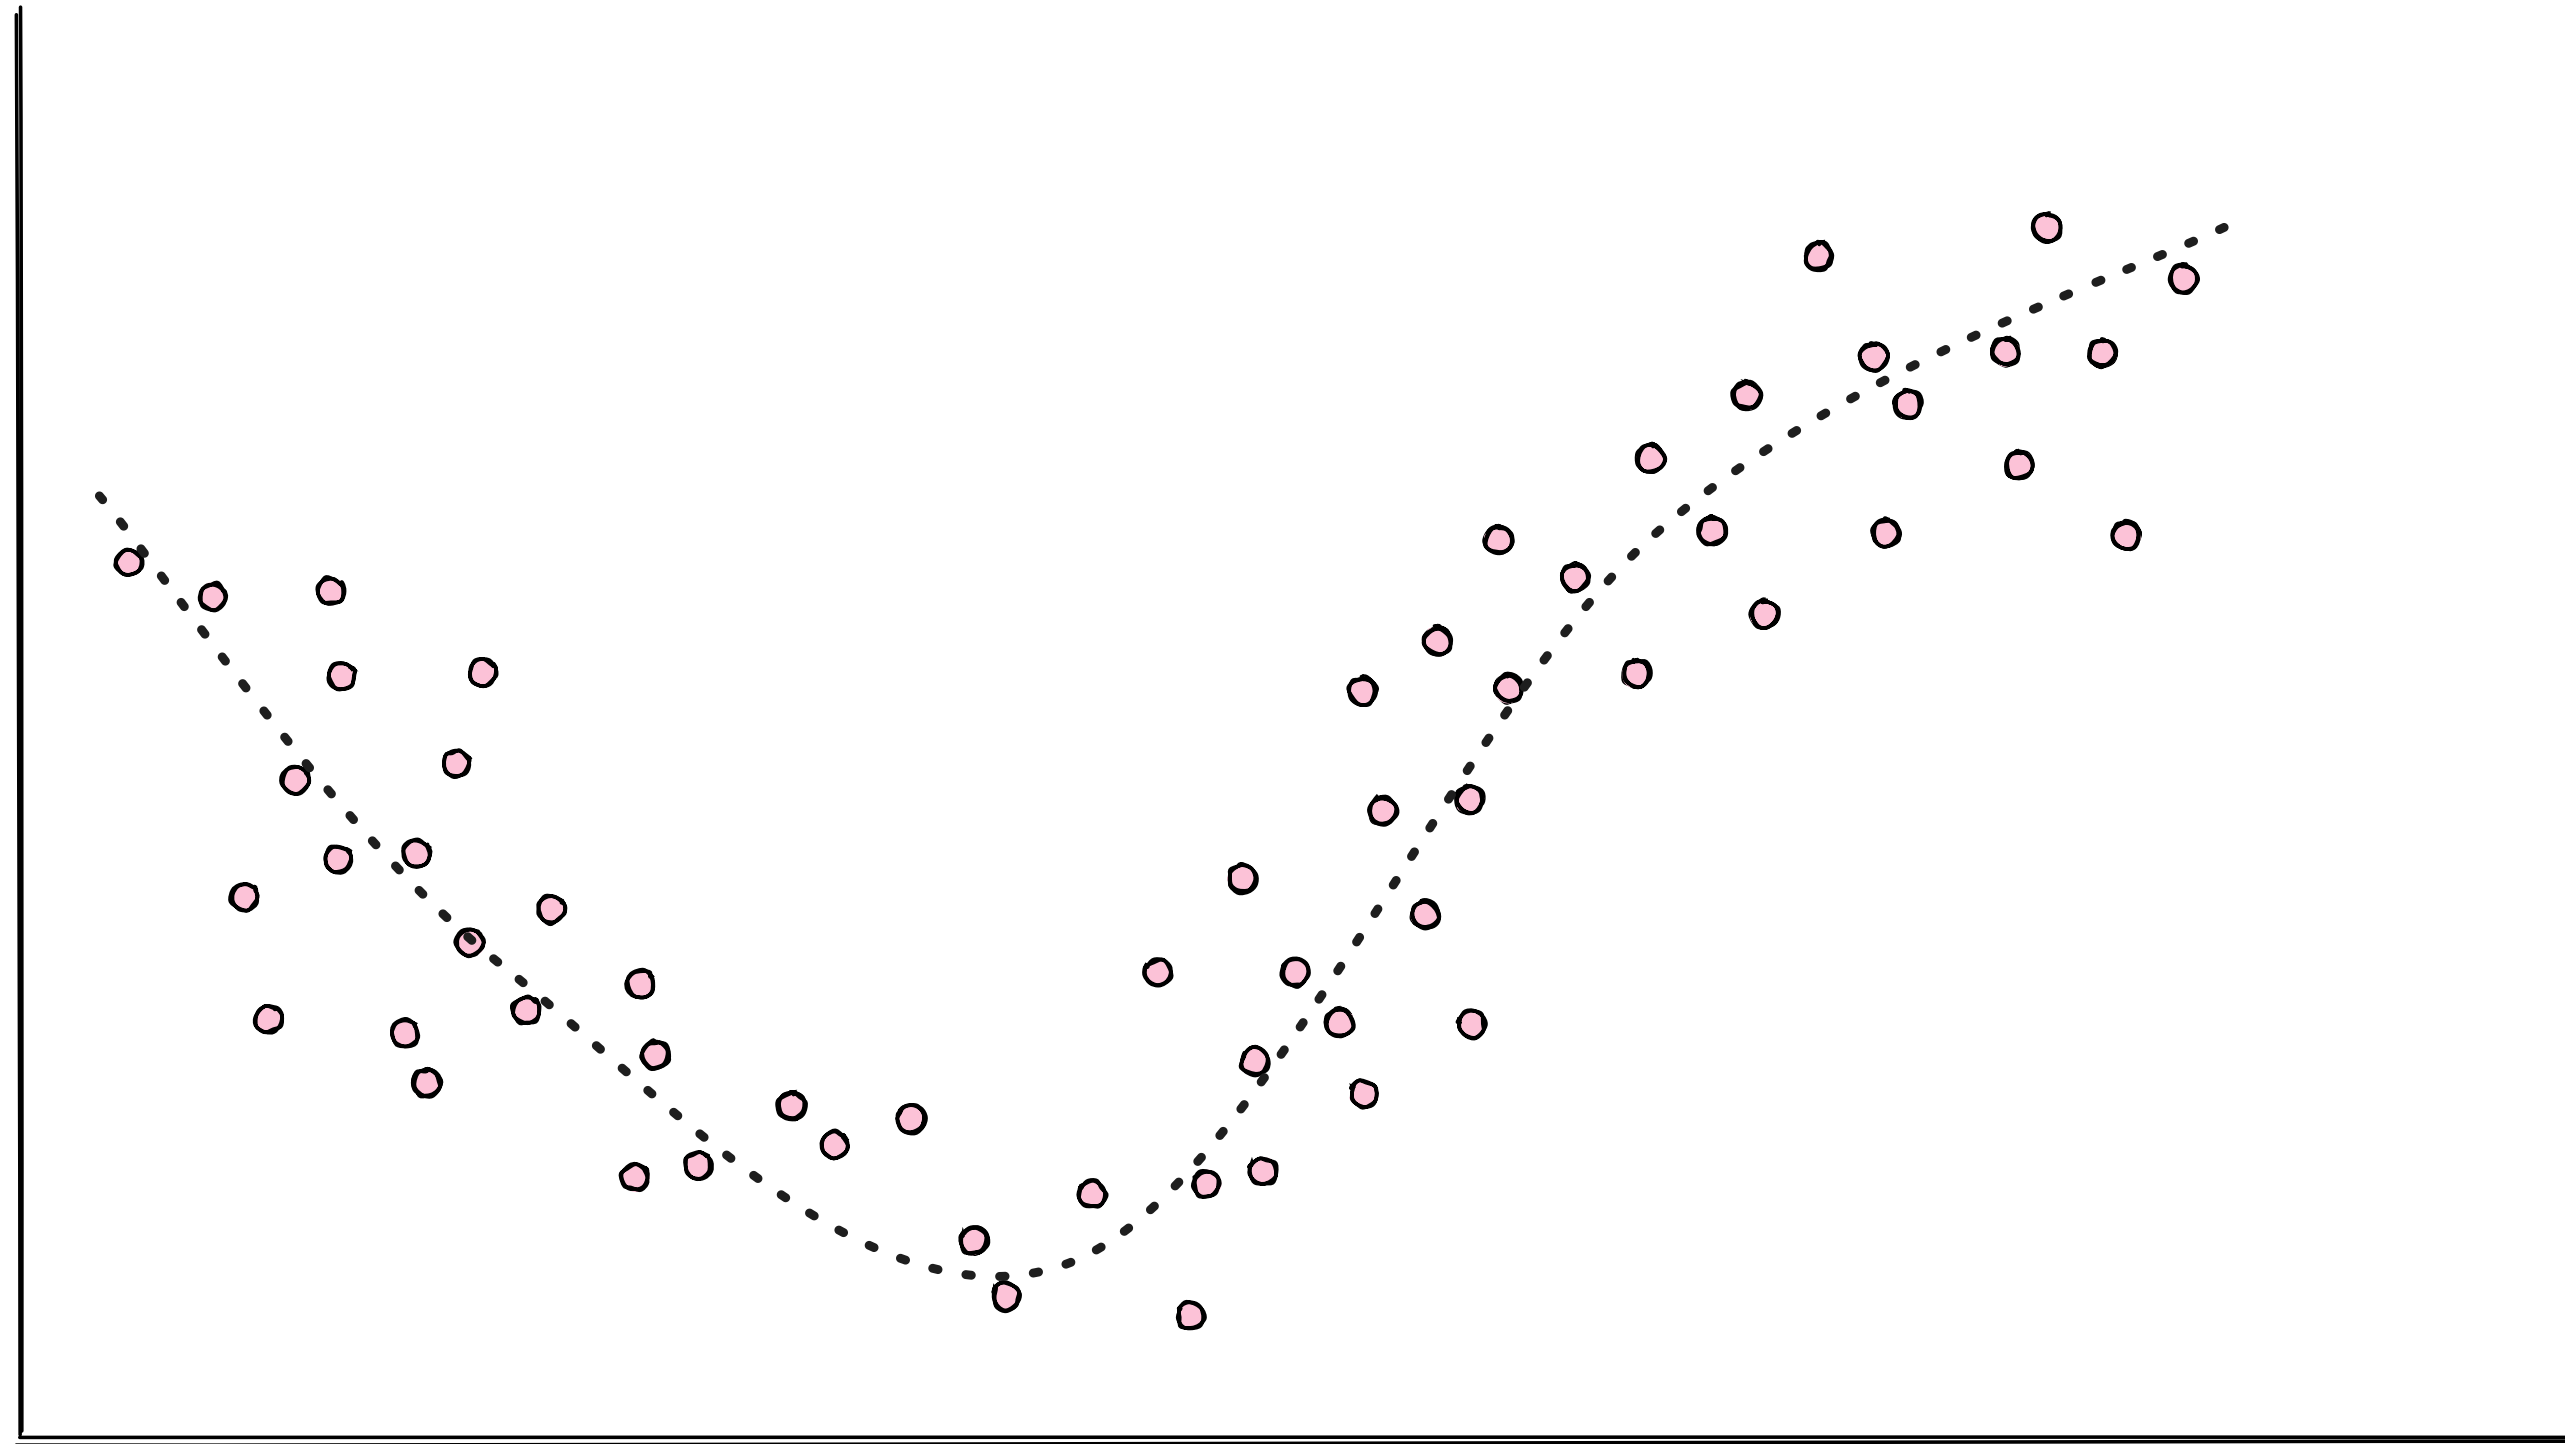

sobreajuste

Underfitted

subajuste

Robust

balanceado

Organização dos dados

Conjunto de Treinamento

Utilizado para ajustar
os parâmetros do modelo

Conjunto de Validação

Usado para ajustar
hiperparâmetros
e evitar overfitting

Conjunto de Teste

Usado para avaliar o
desempenho final do modelo

Métricas de Avaliação para Classificação

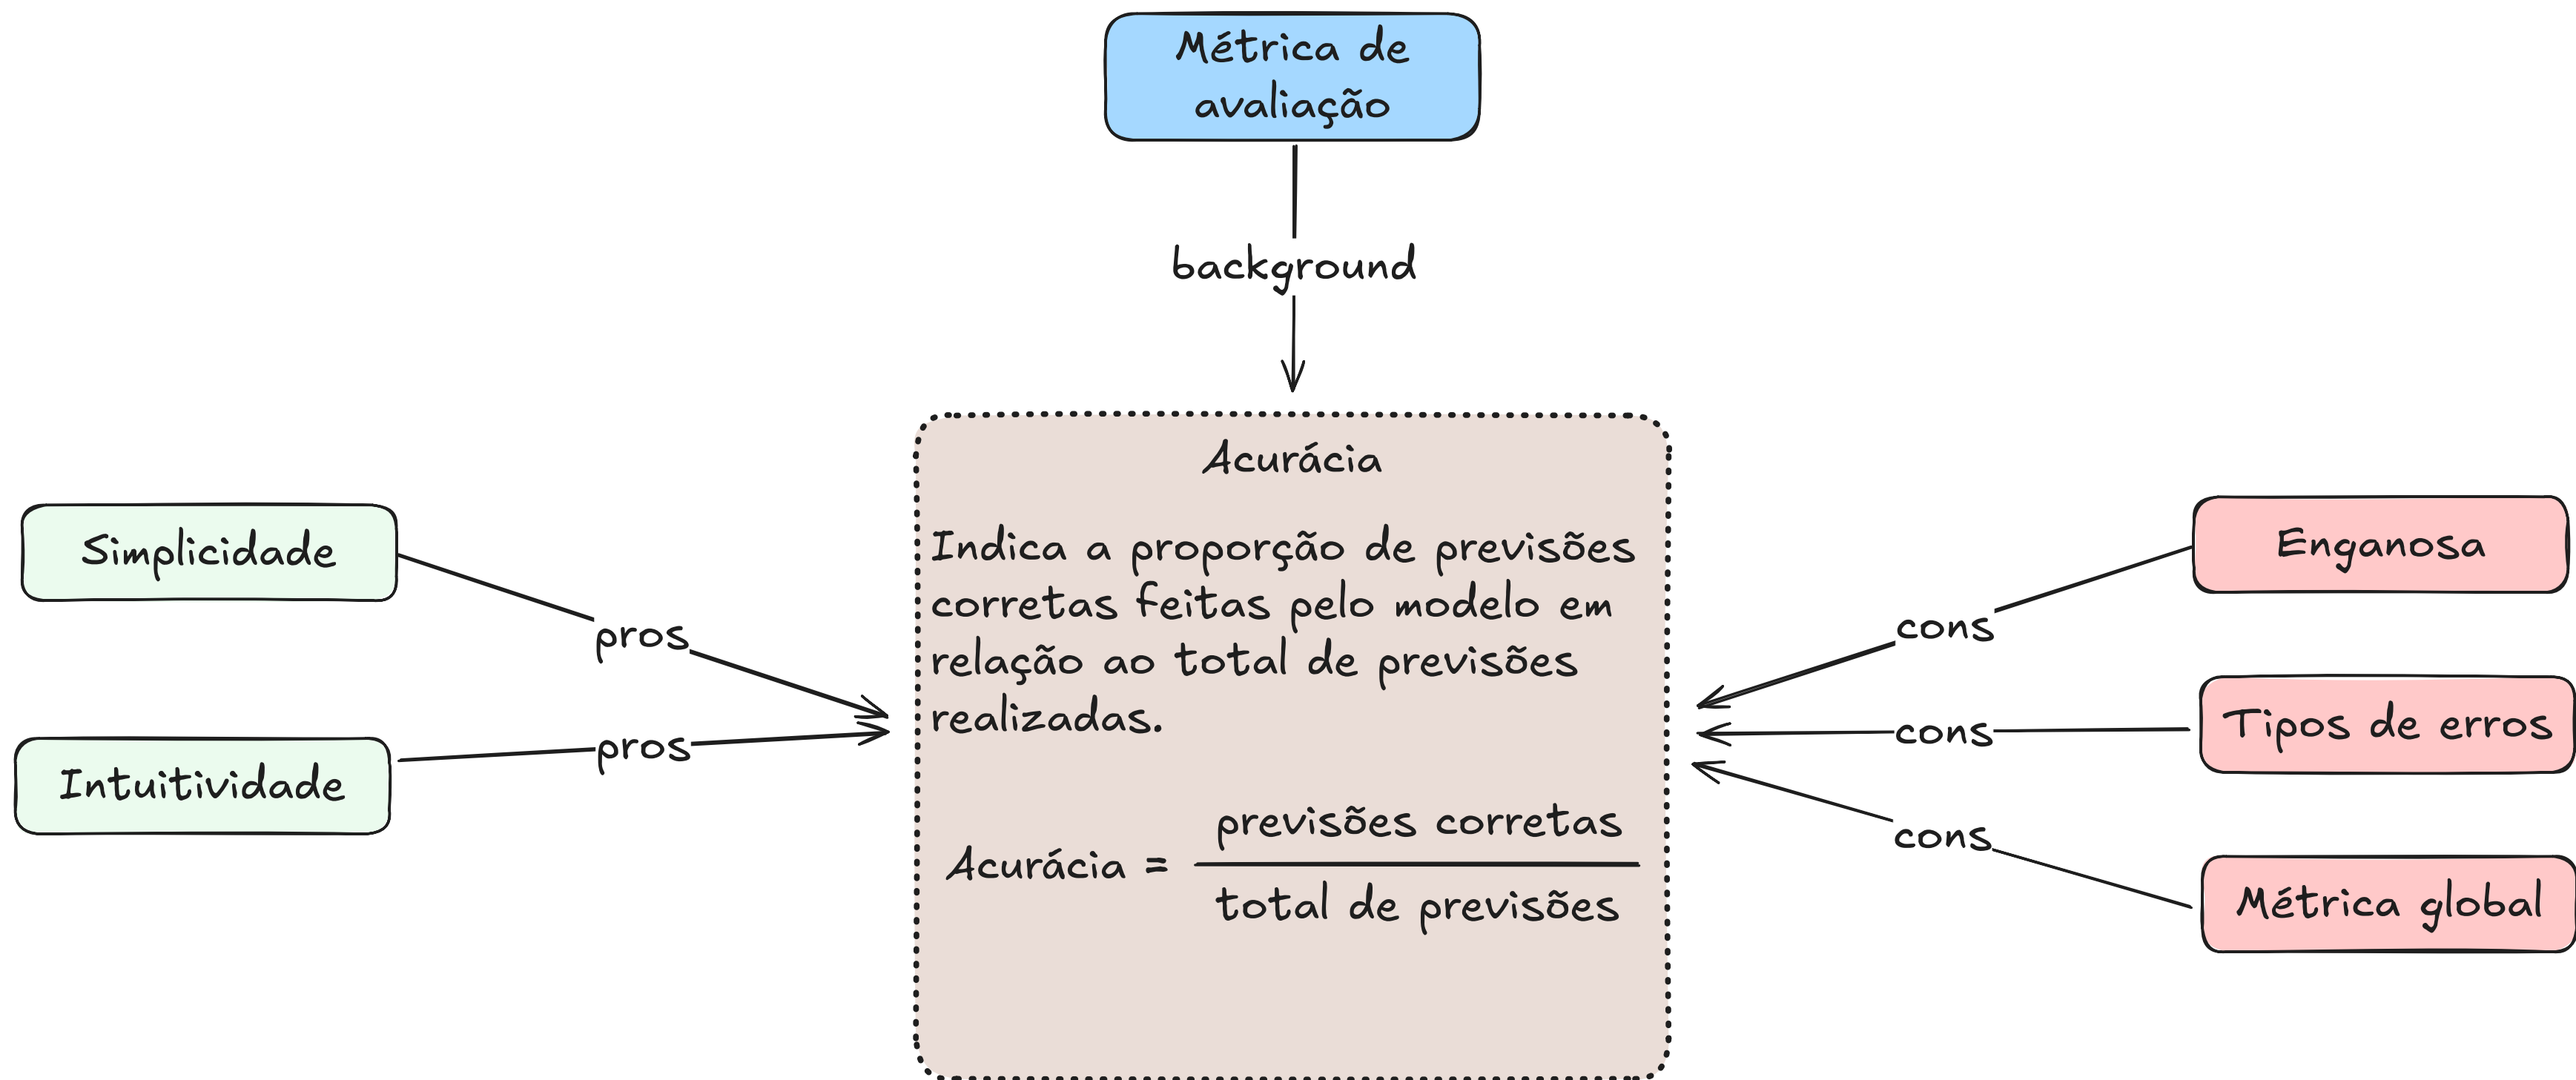

Acurácia

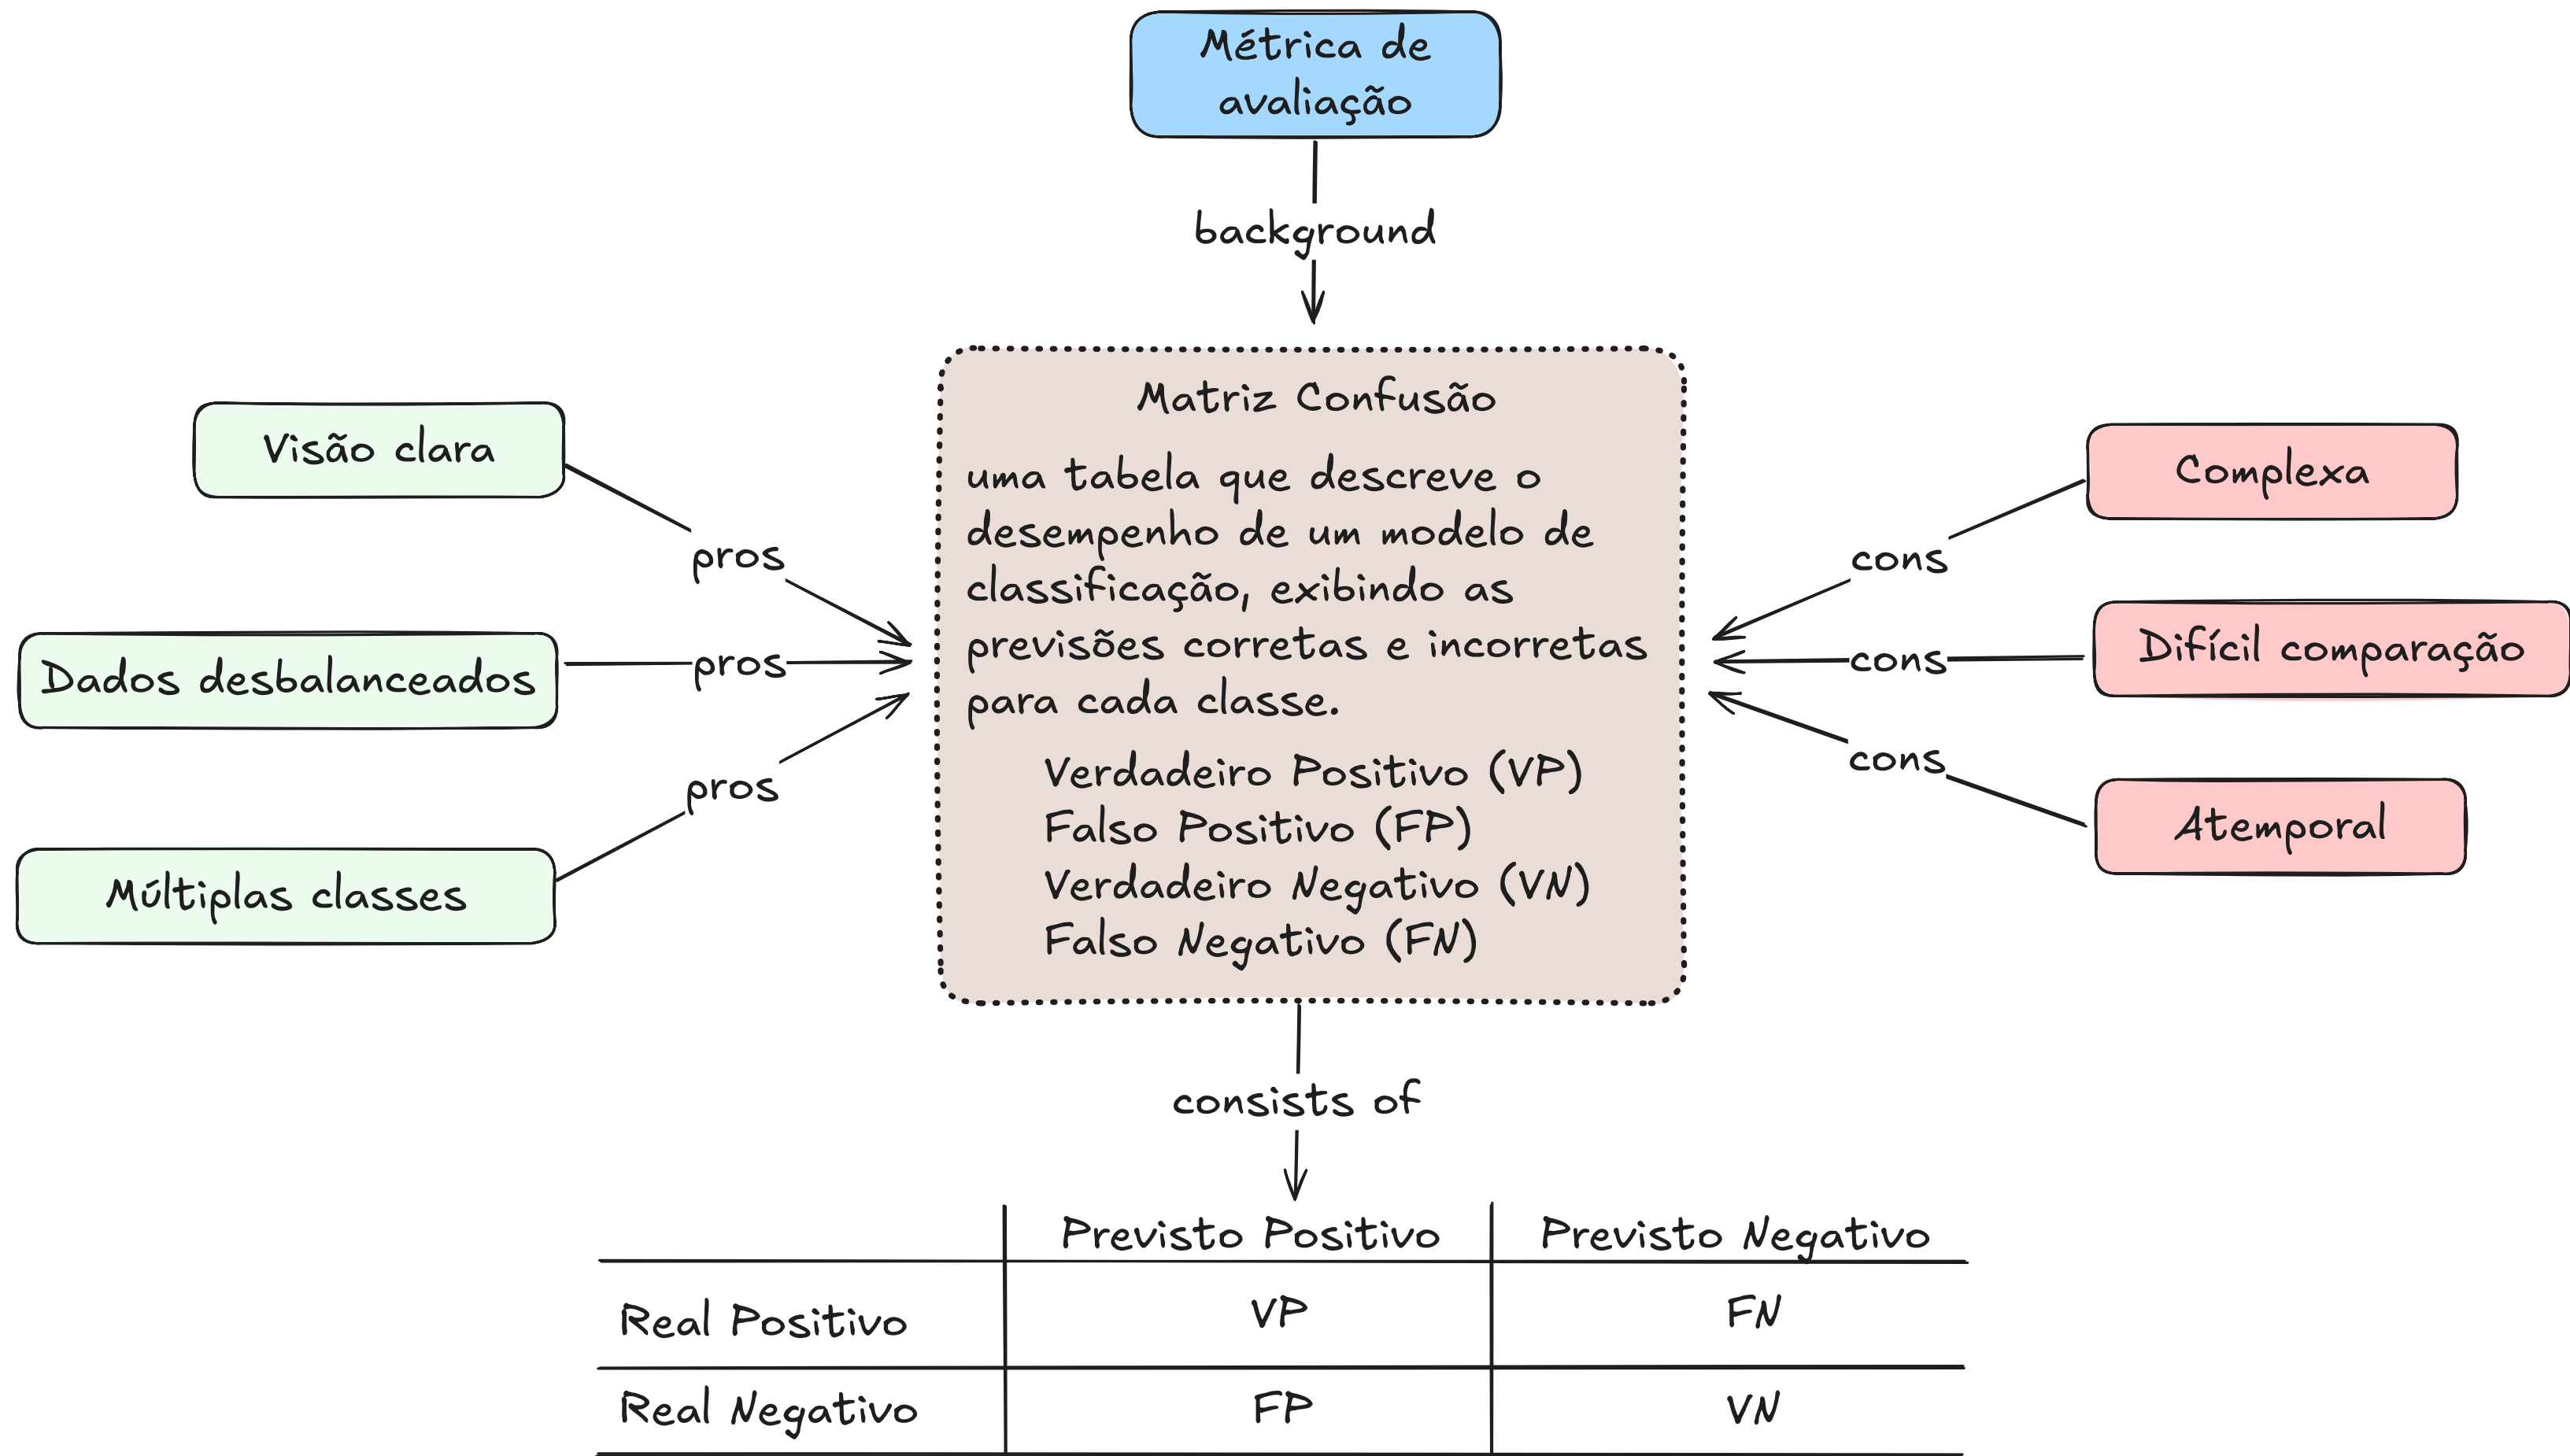

Curva ROC e AUC

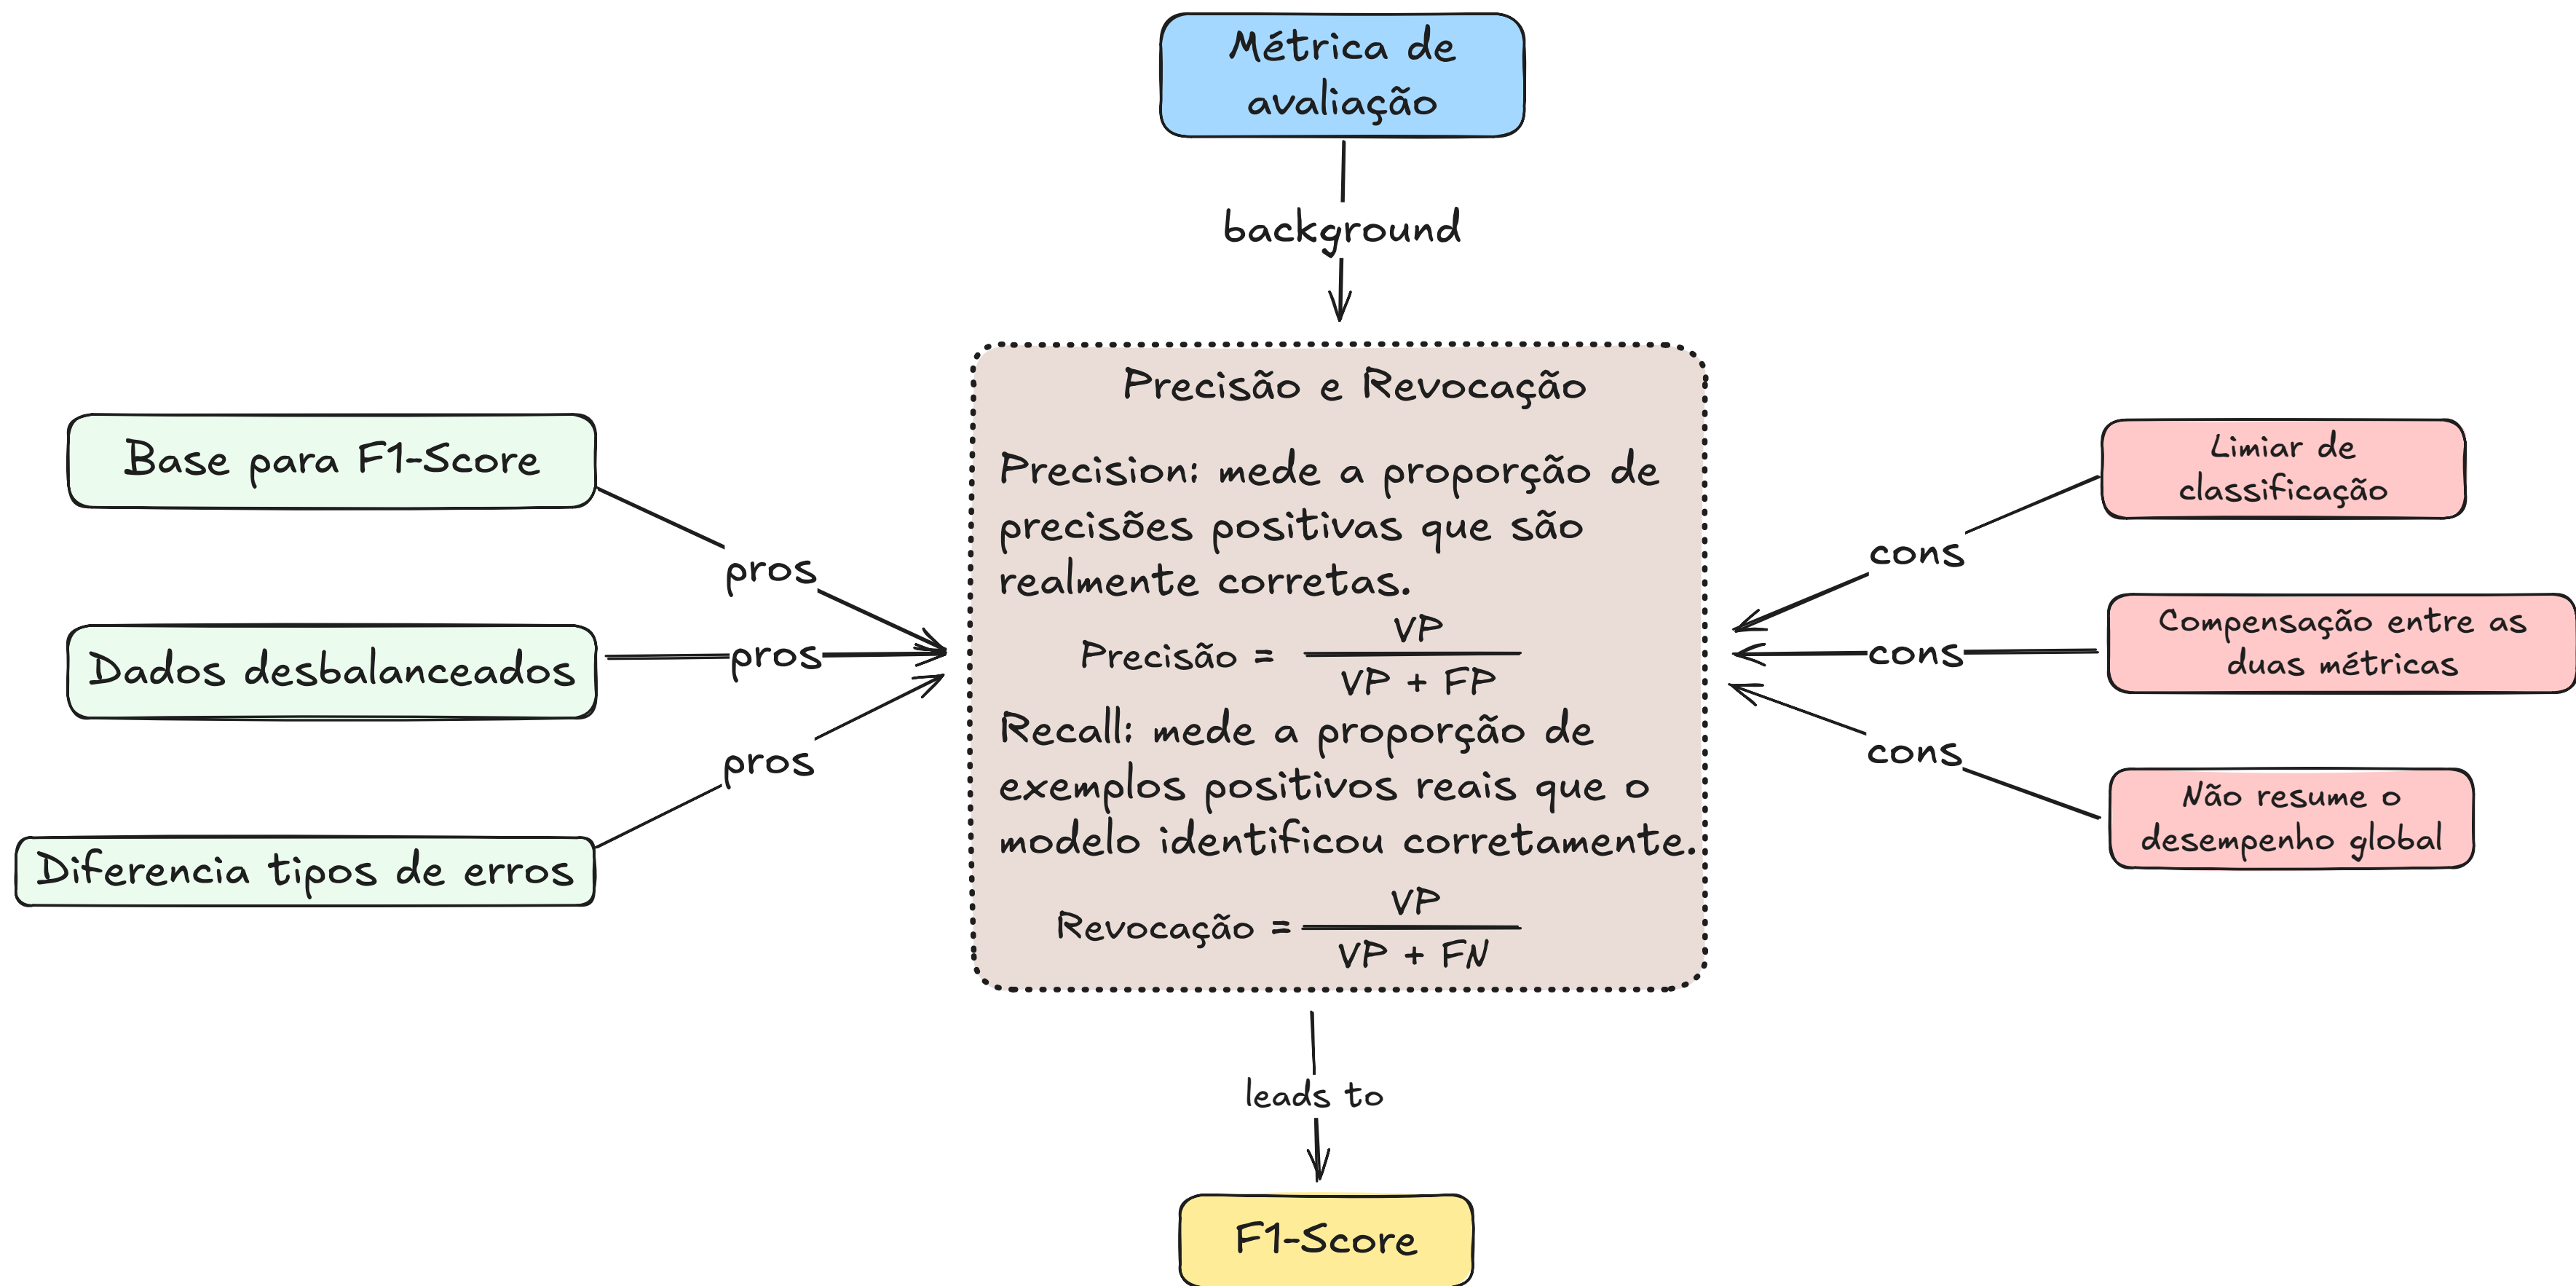

Matriz de Confusão

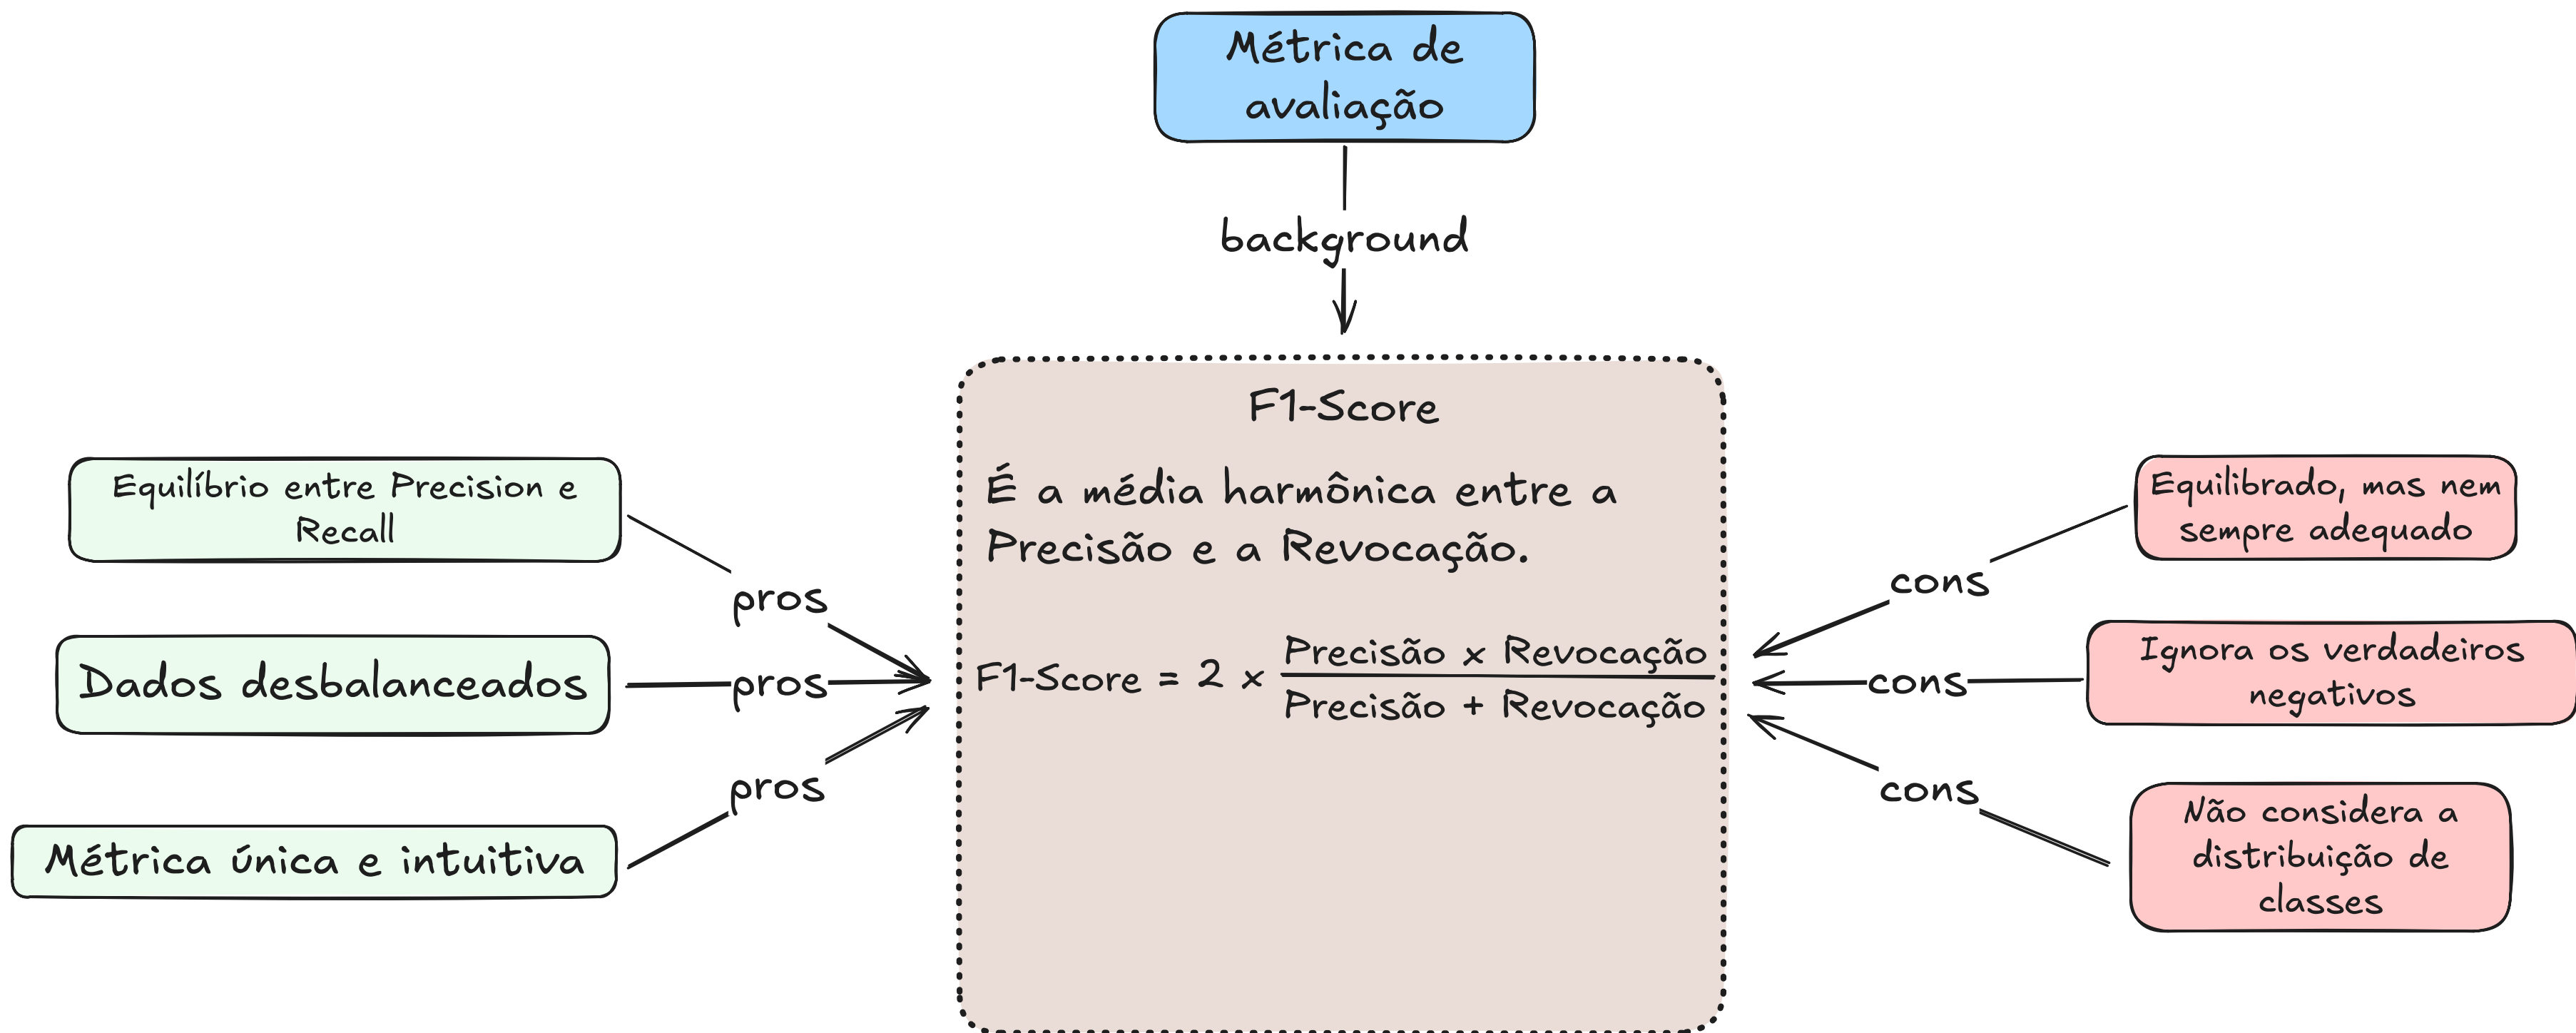

F1-Score

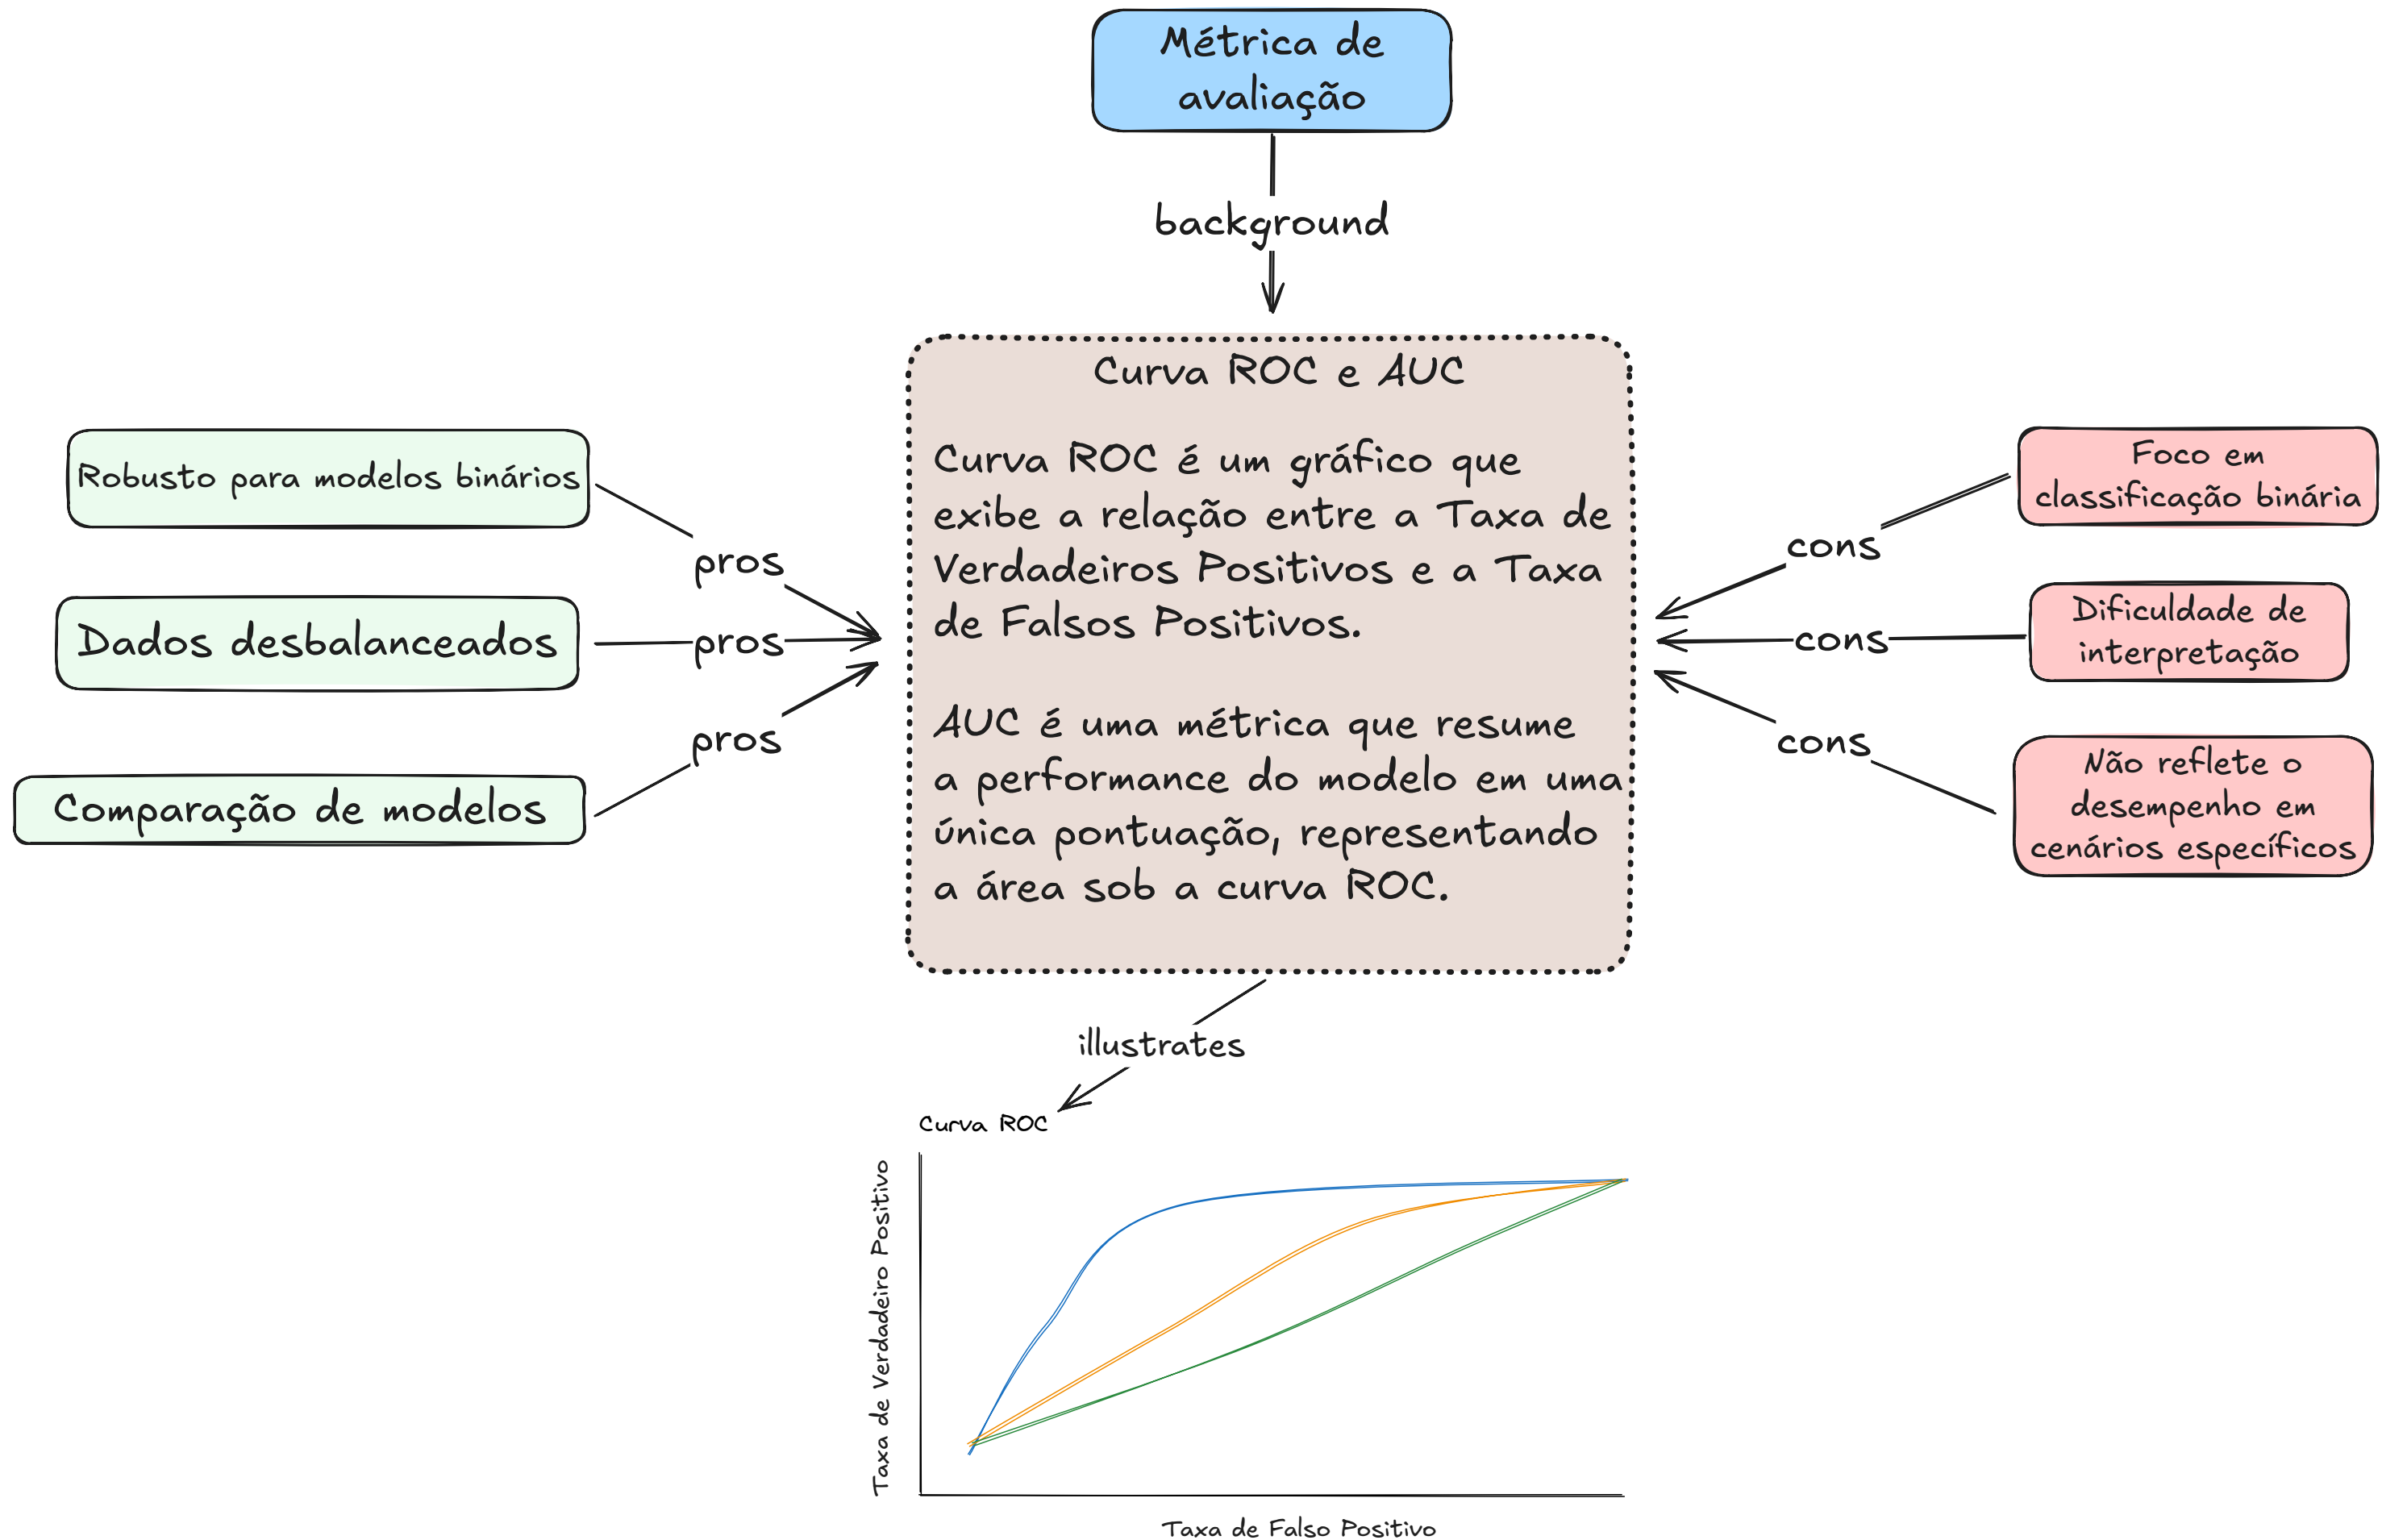

Precisão e Revocação
